

BRIGHT IDEAS

Busway System from Con-Tech. Power Where You Need It.

Con-Tech Lighting's busway system is the new performance standard in flexible power distribution. Busway is precisely engineered to address lighting and power distribution requirements in retail, industrial and commercial applications where physical appearance, the need for post-installation reconfiguration and overall cost-efficiency are critical. The first system to be called a track busway system, it distributes intra-facility power via bus bars safely protected within an insulated aluminum track. Other products for wire handling and low ampere power distribution have been developed, but do not provide the same flexibility and have higher installation costs than this system. Continuing to lead the way in changing the way you think of power distribution, the Con-Tech busway system is revolutionary for the intra-facility power distribution environment. An extremely cost efficient system, it can free up capital that can be invested elsewhere in your facility or which can fall directly to your bottom line.

POWER WHERE YOU NEED IT

Lux Beam Architectural Grid System by Con-Tech

This architectural grid system provides an aesthetically pleasing way to create positive "people scale". Using Lux Beam to lower ceiling height improves customers' comfort, allowing them to linger and buy more. As an architectural element, this system can replace unsightly unistrut and will allow more efficient lighting by bringing the fixtures closer to the merchandise.

This system can be used as straight runs or as an intricate grid system. It is ideal for supermarkets, floral areas, eating areas and large-scale retail...anywhere you want to easily create a more comfortable feel in a large space.

This grid system features Con-Tech track, which is compatible with our extensive selection of

track fixtures for any design need. cULus listed.

To schedule a demonstration of this system please contact our Sales Dept at info@kli-hi.com

LSI GREENLEE Introduces the ALV Series

For more than two decades, LSI Greenlee has been an industry leading brand in both commercial and residential HID landscape lighting. Building on this extensive experience, LSI Architectural Outdoor Lighting has created an impressive new family of low and line voltage architectural luminaires – the LSI Greenlee ALV Series. This series of luminaires includes Accent Lights, Direct Burial Luminaires, Recessed Wall Mounted Luminaires, Surface Mounted Wall Cylinders, Pathway Spread Lights, and Sign Lights. These specification-grade luminaires enable you to envision and create the exact ambiance by extending architectural and landscape beauty beyond daylight hours. Designed and engineered to deliver the very best, these highly corrosion-resistant luminaires feature Four shield designs with two lens options, An exclusive Posi-Seal™ lens retainer and gasket design, Collar Shields with precision machined aqueducts and flush lenses that allow water runoff, A wide selection of housing materials and finishes, An extensive array of lamp options (MR11, MR16, PAR20, PAR30L), A choice of recessed or flush machined tempered glass lenses, A wide variety of mounting configurations and accessories, A selection of Louvers, Color Filters, and Spread Lenses and A large range of power supplies (transformers and ballasts).

Stratos Extruded T5 Linear Series From ALS

Taking full advantage of the small size and enormous output of T5 lamp technology, **Stratos** was truly designed from the inside out. The reflectors and diffusers were first shaped to produce the best possible performance from the lamps while keeping the fixture as compact as possible. The housing was then shaped around the reflector/diffuser assembly. As happens in so many cases, form followed function to yield a shape of exceptional and unique beauty. Finally the shape was enhanced with crisp yet subtle details, to accentuate it's characteristics without over-embellishment. The result is a simple, uncommonly elegant design that can be admired as an object, while blending with almost any interior design. The exterior housing is comprised of rigid extruded anodized aluminum side panels that are attached to die cast aluminum ends using stainless steel aircraft fasteners.

Stratos is available in models yielding anything from all-downlight to 60/40 down/up distribution. With its diminutive scale, versatile lumen output options, and numerous diffuser and finish choices—there's hardly a place where **Stratos** won't work.

Helix™ Track System by Lucifer

Helix® is a flexible track for low voltage spotlights. It winds through space, casting light in the most whimsical way.

Designed to be minimally intrusive and stand alone as a lighting sculpture, Helix is restricted only by the designer's imagination. Frequent installations include restaurants, bars, retail spaces, office corridors, conference facilities, and residential interiors. The nickered chrysocale track can be manipulated into almost any position in any environment, restricted only by a 12-inch bending radius. Available in single or parallel joined sections which can split and swirl in opposite directions illuminating columns and other architectural details, the track is pendant-mounted with stem supports in fixed—or adjustable—lengths of up to 24 inches. The spotlights may be pivoted in two planes or mounted on the track for continuous up—or down—lighting. Lamp options include MR-11, MR-16 and AR-111, 50 watts max and operates at 12 volts. For more information go to www.luciferlighting.com or contact our Sales Dept.

KLI is known as the premiere lighting manufacturer's representative in Hawaii since 1976. In general, we promote our lighting manufacturers through Architects, Engineers and Designers and distribute through wholesale electrical houses.

KLI was originally incorporated in 1976 under the name KLOPFENSTEIN'S and operated out of a house in Hawaii Kai. In December of 1987 we moved our operations into our present location on Nuuanu Ave in Downtown Honolulu. In 1997 we reincorporated as KLOPFENSTEIN'S LIGHTING INC (KLI).

Our primary purpose is to provide the best product for your application with efficient service for all your needs.

Lifestyle Series from LSI Greenlee

The new Lifestyle Series allows you to create attractive, pedestrian scale luminaires from a palette of standard, modular components with an appearance that is second to none.

Custom creations have never been easier. Using a variety of interchangeable, modular components you can construct hundreds of looks that meet virtually any design application. Choose the Crown, Shade, Size, Mount, Color, Accents, and Optics that are right for your project and write the specification. The possibilities are endless: Simply mix, match, and stand back to marvel at your custom creation.

The striking architectural appeal of this imaginative family of fixtures is matched only by its optical performance—the same superior performance you've come to expect from all LSI Greenlee luminaires. Select any of the four available distributions and you can be confident that illuminance will be precisely positioned on your project.

Lifestyle's Specification Grade Performance is reflected in more than just optics. Solid seals, quality materials, and robust component design are as apparent as its good looks. Touch, admire, and specify this remarkable product family from a company you've known and trusted for years.

The Lifestyle Series offers you unprecedented value: superior performance, quality construction, and attractive appearance at an affordable price, with dependable delivery dates.

Lifestyle Series luminaires are the answer for all your time-critical projects. The flexibility of modular components not only gives you creative control, it speeds production, too. Lifestyle eliminates the long lead times typically associated with specification grade and custom fixtures.
